VISUAL CLASSROOMS

HTTPS://VISUALCLASSROOMS.COM
Visual Classrooms (https://visualclassrooms.com) is a research validated discussion and collaboration platform that offers learners new ways to engage with peers and instructors. Integrated into any Learning Management System, our interactive digital whiteboard encourages students to quickly capture, share, synthesize, and improve their ideas together using any media.

More than just a technology, Visual Classrooms was developed at Tufts University to support active learning pedagogies that increase peer interaction and enable adaptive instruction. Our tools promote a learner-centered focus with an emphasis on interactivity and scalability. Visual Classrooms provides continuous feedback and embedded analytics that help educators personalize learning and ensure that no one falls through the cracks.

✿ WHAT IS VISUAL CLASSROOMS?
“A NON-DISRUPTIVE DISRUPTION”

✔ REAL COLLABORATION
Embedded tools help students synthesize, question, build on, and improve each others’ thinking.

✔ CONTINUOUS FEEDBACK
Analytics support interactive and adaptive instruction in both face-to-face and online learning.

✔ FACILITATE PRODUCTIVE DISCUSSIONS
Jump-start in-class discussions by bringing student work directly into the teaching and learning process. Embedded tools let you highlight, filter, and compare ideas in Visual Classrooms, transforming lectures into interactive discussions.

✔ GIVE UNDERSERVED MINORITY STUDENTS A VOICE
Provide underserved minority and ESL students flexible ways to express their ideas, giving them an opportunity to have a voice in the discussion.

✔ STUDENT ENGAGEMENT
Students are now the creators: integrated sketch, screen capture, camera, video sharing, formula creator, HTML editor.

✔ DIGITAL WHITEBOARD AND FORUM
After selecting a Visual Classrooms activity, students can add new ideas to solve a problem, respond to comments, compare thinking, and discuss and provide feedback. Instructors can require students to add a new idea before they are able to see each other’s posts to stimulate both individual and collaborative learning. Instructors can provide immediate feedback to students and respond to their questions.

FLIP THE CLASSROOM
Extend learning by bringing homework into the classroom to provide a personalized, engaging experience for every student - whatever their learning style. Then you can spend class applying knowledge with interactive activities.

SOCIAL HOMEWORK
Engage students and build camaraderie while working through homework problems together. Students critique their own and their peer’s reasoning and thinking.

IN-CLASS INTERACTIVITY AND PEER LEARNING
In both classroom-based and online classes, students discuss important concepts together and learn from the diverse thinking of peers. Instructors identify and address students’ misconceptions.

SMALL GROUP WORK
Use student ideas as a starting point to get classmates interacting not only with the material but with each other. Groups can articulate their thinking and improve their conceptual understanding together.

COLLABORATIVE LABS
Teams document their procedure, share their data, and use information from the entire class to analyze results and reach conclusions.

CROWDSOURCE EXAM REVIEW
Students work together to develop and post sample test questions, collaboratively developing a study sheet covering important topics. Instructor can easily see if students are having problems and provide feedback online or as a mini-lecture.

WHY VISUAL CLASSROOMS?

VISUALLY DRIVEN DESIGN
Our interactive digital whiteboard encourages students to create and share rich content in Visual Classrooms, which fully leverages the multi-media power of modern devices. Integrated sketch pad, videos and images from mobile devices, screen capture, formula builder, and much more.

WORLD CLASS ANALYTICS
Developed in an education research lab, Visual Classrooms provides users with ongoing feedback, visualizations and reports about contributions and interactions. Understand who is sharing, who is interacting, and who is engaged.

SEAMLESS LMS INTEGRATION
Quickly and easily integrate into any learning management system via LTI. No additional logins, no complicated data importing. Send grades from Visual Classrooms directly into your LMS.

ENCOURAGE COLLABORATION AND TEAMWORK
Peer interaction and collaboration are critical to online and blended learning. Work with classmates and mentors on group projects to solve problems, share ideas, and refine your thinking.

VIRTUAL SECTIONS
Easily divide large classes into virtual sections, where by default, students only see posts from their own section. Assign TAs to specific sections to monitor and help students.

RESPONSIVE HTML5 DESIGN
Nothing to install, no apps to update, no plugins. Responsive design is optimized for every screen size. Any device, any operating system, any browser.

See for yourself how educators around the world feel about using Visual Classrooms to support blended and online learning.

DAWSON COLLEGE

“Visual Classrooms has given me tools to scaffold student-directed, active learning. I get near real-time insights about every student’s understanding, analytical abilities, and communication skills. This has both challenged and enabled me to respond to the ideas and needs of my students more creatively. My students are more engaged, my classroom is more dynamic, and I am both a co-learner and co-teacher.”

- Sameer Bhatnagar, Dawson College

TUFTS UNIVERSITY

“In this global world teamwork is critical, no one does anything alone, but instructors don’t provide many opportunities for students to practice working together as a team or to learn from other teams working on the same project. Technology is vital to this kind of collaborative learning and it must be a lead design goal. The Visual Classrooms collaborative workspace enables students to see, organize, build on, and synthesize one another’s ideas as they unfold in real-time.”

- Dr. Ethan Danahy, Tufts University

BOSTON UNIVERSITY ACADEMY

“Millennials are asynchronous kids. They’ve been raised in a world of online interaction and communication and often feel more comfortable opening up virtually. Once they do, then they are more willing to take greater risks in face-to-face discussions. Shy students become more active and engaged in class because they can work at their own pace. This would not have been possible without Visual Classrooms.”

- Gary Garber, Boston University Academy

VANIER COLLEGE

“When we use Visual Classrooms all of my students are engaged in deeply meaningful discussions about applying the concepts I am teaching them. Students report that using Visual Classrooms makes them more likely to come to class and more likely to stick with the course. And students’ physics conceptual test scores are off the charts!”

- Rhys Adams, Vanier College

Go to our demo site and try Visual Classrooms for yourself. Log in as a student or teacher and try the amazing features we have to offer!
